

FROILAN DE LEON OCUBILLO

Brgy. Dayap, Calauan, Laguna | 0970-152-0052 | ocubillofroilan@gmail.com | github.com/ocubillofroilan-dev

SUMMARY

Self-taught developer with a solid foundation in Python, gaining hands-on experience with Django and Flask, and actively working toward full-stack development with FastAPI and Flutter. Alongside programming, developing practical networking fundamentals including TCP/IP concepts, user and server management in VirtualBox, and basic network cabling and topology design using Cisco Packet Tracer.

WORK EXPERIENCE

Healthcare Customer Service Representative Nov 2024 - Feb 2026
Nextvas | Los Baños, Laguna

- Recognized as both a Top Agent and a Top QA performer for two separate months, reflecting excellence in both output volume and communication accuracy.
- Handled inbound and outbound customer communications through email and SMS/text. Provided support to multiple teams as needed, demonstrating flexibility, problem-solving skills, and effective collaboration across workflows.
- Applied programming knowledge to create automated templates using Python in PyCharm and Notepad++, and developed an Excel-based tool connected to the main ticket submission system streamlining the process by eliminating the need to fill out 2–3 pages of forms just to submit a single ticket.

Engineering Department Intern Jun 2023 - Sep 2023
Furukawa Automotive Systems LIMA Phils., Inc. | Lipa City, Batangas

- Assisted the engineering and maintenance teams in improving production boards to reduce defects and increase operational efficiency. Supported the maintenance department through documentation, task tracking, and monitoring of staff activities.
- Applied programming knowledge to redesign the frontend of the maintenance department's software application including checkboxes, dropdowns, and color-coded issue levels making the process of logging production line concerns and recording resolutions faster and more organized. Presented the redesign to the IT department, achieving a 90% approval rate.

Store Staff & Cashier Nov 2022 - Jun 2023
Telay Store 888 | Masapang, Laguna

- Handled cashier duties during peak hours, ensuring accurate transactions and efficient service.
- Managed the packing of purchased items, processed customer orders, and organized product displays to maintain store cleanliness and presentation.

PROJECTS & THESIS

Arduino-Based Polyethylene Terephthalate Bottle Filament Maker for 3-D Printing for Brgy. Dayap, Calauan, Laguna. Thesis

- Contribution: Led the project group and managed documentation throughout the development process, programmed the system logic using C++ with AI assistant, designed mechanical components using AutoCAD, and handled the wiring and cabling for hardware integration.

Job Finder Website 2nd Year College Project

- Contribution: Led the project group and managed documentation throughout the development process. Designed the website layout in Canva, structured and built the site using HTML and CSS with AI assistant, and contributed to the MySQL database.

Authenticated Notes & CRM Website Personal

- Built a notes and CRM web application using Python (Flask and Django) with HTML and CSS for the frontend, and MySQL/PostgreSQL for database management, utilizing AI-assisted tools.

Virtual Box Server & Client Set-up and Cisco Packet Tracer Topology Network Personal

- Practiced managing multiple users and servers using VirtualBox, and designed network topologies with cabling in Cisco Packet Tracer.

EDUCATION

Bachelor of Science in Entrepreneurship | Pamantasan ng Lungsod ng San Pablo July 2025

ADDITIONAL INFORMATION

TECHNICAL SKILLS:

- Microsoft (Word, Excel, PPT), Slack, Notion, HTML, CSS, Python (Django, Flask), Postgres, MySQL, Git, Git Bash, GitHub, VS Code, Java, C++, AutoCAD, Arduino IDE, and Networking.

CERTIFICATIONS:

- Computer Systems Servicing (E-Tesda Certificate) | freeCodeCamp - Python and Relational Database | Cisco NetAcad - Python Essentials
